

Modular Barrier Guards

Protect workers by installing customized, self-supporting conveyor guards.

Easy to Install

- Self-supporting structure
- Customized for each application
- No welding or cutting required
- Sets up easily with modular bolt-together design

Easy to Maintain

- Guards remove in seconds for equipment access

Built to Last

- Heavy-duty steel construction
- Powder coated for increased durability

Customizable Options

Handles: Ergonomically friendly handles for easy removal of the guard

Wedge Clamps: Eliminate the repetitive motion of tightening and loosening fasteners

Access Doors: Full entry to key areas (with proper procedures in place)

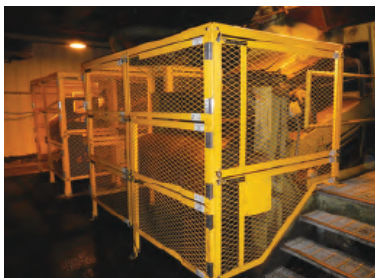

Service Doors: Access smaller areas for inspection or maintenance (with proper procedures in place)

Weight Labels: Create a visual cue of guard weight before you lift

Laser Cut Identification: Easily reference equipment when performing maintenance tasks

Signs: Standard and custom signs can be added to visually convey safety messages

Black Mesh: Improves visibility and allows for the use of touch-less measuring devices
