

BenePak Suppression Systems

Key Features & Benefits

Stainless Steel Fabricated Enclosure

Containing all water and chemical piping and supporting system control panel

Water Inlet Design

Isolation valve, inlet strainer, manual blow down valve, water line pressure regulating valve with pressure gauge, flow meter (mechanical) with non re-settable totalizer, solution line isolation valves and solution line solenoid control valves.

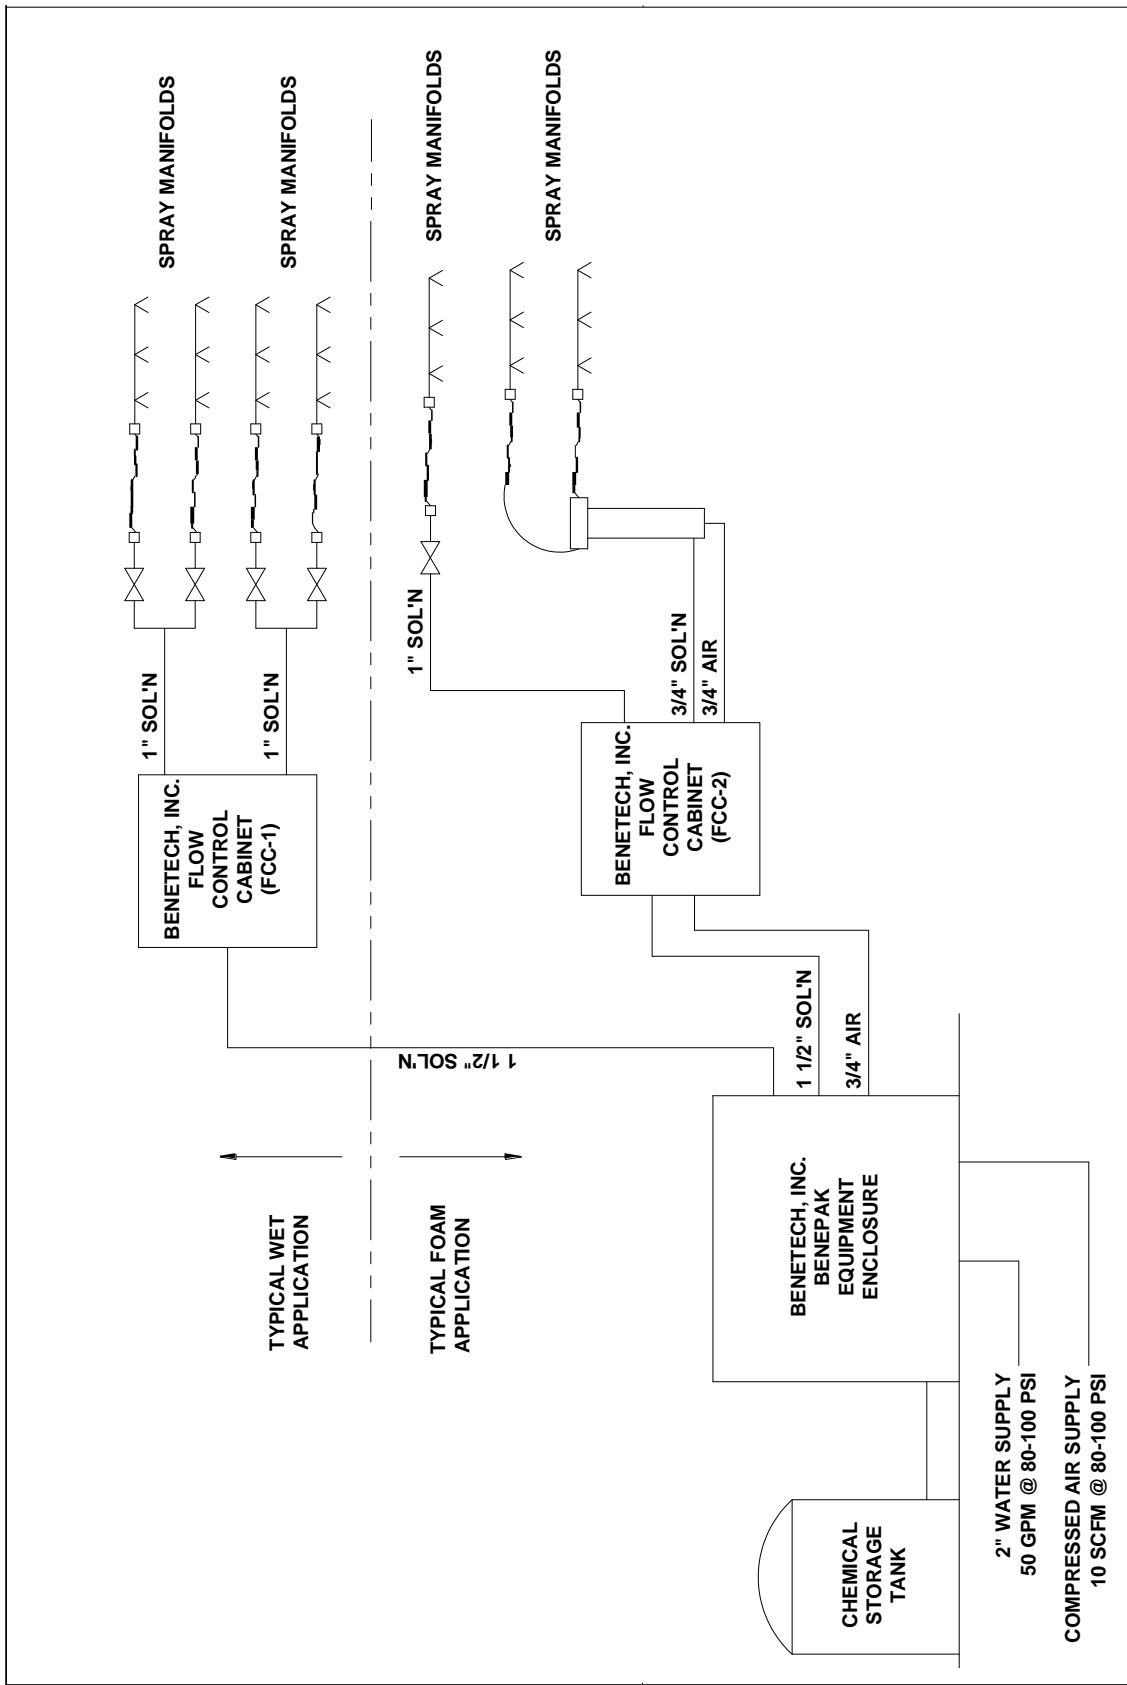

Chemical Inlet Design

Isolation valve, inlet strainer, usage calibration column, solenoid valve, metering pumps and outlet check valves.

All piping is schedule 40 galvanized, with 150# threaded galvanized fittings.

Benetech designed NEMA 4 control panel with power disconnect switch, circuit breakers, motor starters, programmable controller, terminal strips and associated wiring.

BENEPAK DUST SUPPRESSION SYSTEM
TYPICAL GENERAL ARRANGEMENT
