

Dust Tight Inspection Doors

Durable Technology to Fit Your Needs

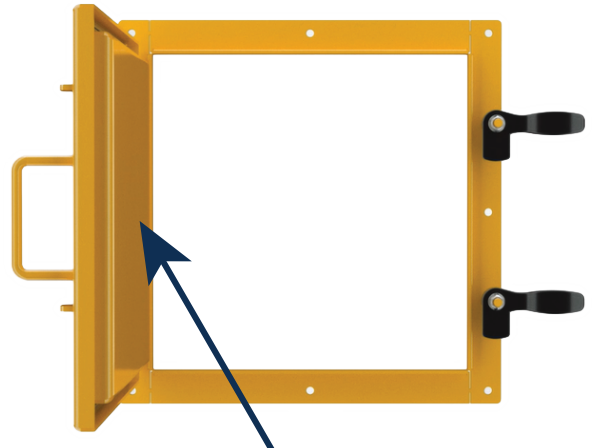

Two ongoing concerns when it comes to maintaining your chutes and other equipment:

- **Housekeeping to control buildup**
- **Servicing your belt cleaners and other**

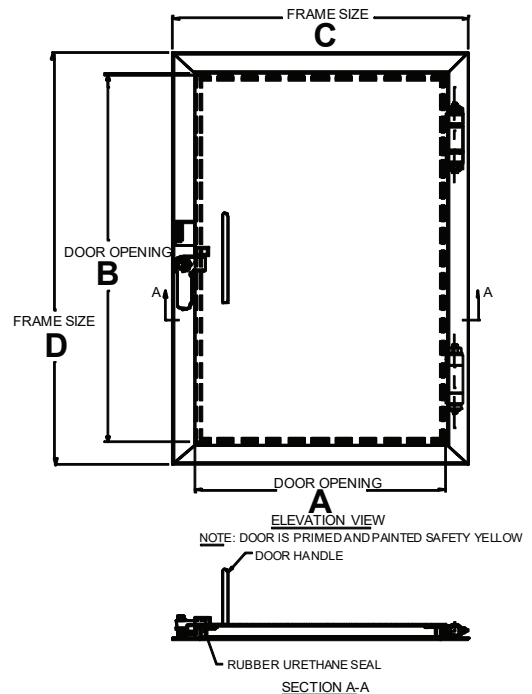

Benetech's Inspection Doors allow you to tackle both of these necessary steps head on. These easy to install doors have a unique design that allows you to have full access for service and maintenance, while providing a dust tight seal. Benetech's Inspection Doors are a proven technology that helps minimize airborne dust while providing easy access.

Key Features & Benefits

- **Unique door deflector panel** ensures material does not accumulate on door seal
- **Grease fitting on pinned hinges** that ensure no play or locking up
- **Resilient door seals** hidden in groove ensure long lasting service
- **Ergonomic cam-action, never seize closing latches**, with adjustable tension to suit operation requirement
- **Easy to install**- simple cut and weld or bolt on process

Benetech's standard door includes the patented deflector pan which creates a flat interior surface when door is closed, ensuring less dust accumulation on seal.
