

BENETECH **MaxZone**®

U.S. Patent # 8,800,756

Taking Command of Load Zones

Benetech's patented MaxZone® modular skirtboard system seals your load zone to reduce airborne and fugitive dust, preventing product loss and spillage while improving material flow.

With the system's modular design, replacing components can be done without special permits or extended shutdowns. Installation is simple and affordable, and typically no welding is required.
