

Plant Professionals®

Improper maintenance is a leading cause of spillage, material waste, fires, explosions, and unscheduled outages. These can significantly impact plants and personnel. At the same time, governmental regulations are demanding more than ever to ensure safe practices are in place to reduce risks and to protect employees.

The Plant Professionals® team offers comprehensive maintenance, mechanical, and operational assessments to support improved productivity and safety. A partnership with Benetech Plant Professionals Team can be an enormous help.

Utilizing Benetech's field experts for support is cost-effective and can mean the difference between governmental compliance and non-compliance. Our professionals are fully trained in installing and maintaining conveyor components and belt cleaning products to ensure your systems run effectively.

Benetech's Plant Professionals® program is designed to assist and train customers in maintaining and keeping critical equipment running effectively and safely while minimizing downtime.

As your partner, our complete material handling services include:
