

# MaxZone® Series

## Standard vs. Premium

Benetech's MaxZone® Series delivers proven containment performance designed to fit a wide range of material handling needs. Whether your operation demands heavy-duty containment or a streamlined, economical solution, both the MaxZone® Premium and MaxZone® Standard systems help reduce airborne dust, control spillage, and improve material flow.

Featuring modular construction and full customization, each system can be retrofitted to existing conveyors or installed as a standalone solution, giving facilities the flexibility to meet their performance goals and budget without sacrificing quality or safety.
